Failure to Communicate: A 360° Experience about Learner Variability

Go to the camera app and scan this QR code. Tap the button that looks like a device oriented to the side (bottom right hand side of screen) to view in VR.

Failure to Communicate is a 360° experience about Learner Variability in which a teacher is encouraged to look at her class from one of her student's unique and engrossing perspectives.

Synopsis
A young teacher tries to inspire her students, but they remain disinterested in her approach and seemingly in the topic. She is encouraged by a colleague, however, to put herself in the shoes of one of her students to glean unique perspectives of her way of teaching and to adopt new, research-based strategies to make her teaching accessible to the full diversity of learners in her class.
